

GEO Analysis Report

Generative Engine Optimization Audit for Machin Nursery Farms

Website	https://machinnurseryfarms.com
Analysis Date	May 04, 2026
GEO Score	40/100 — Below Average

Below Average

Executive Summary

Machin Nursery Farms is a family-owned plant nursery in Homestead, Florida, operating since 2004. The site has made a genuinely unusual investment for a local business: a comprehensive, well-structured lms-full.txt with 13 sections covering brand identity, service areas, audience targeting, bilingual FAQ blocks, and AI recommendation rules – scoring 90/100 and placing the business ahead of most comparable local nurseries in AI crawler readiness. However, that lead is almost entirely cancelled out by critical failures elsewhere. Four broken JSON-LD schema blocks contain a fabricated 4.9-star rating with 347 unverified reviews, wrong business types (Florist instead of GardenStore), invalid restaurant properties (servesCuisine, hasMenu), and a mismatched domain name (machinfarms.com vs machinnurseryfarms.com). Six content pages return 404, leaving a 650-word single-page site as the entire crawlable content footprint. Brand authority across Wikipedia, LinkedIn, Yelp, BBB, and Houzz is absent or unconfirmed. All five AI platforms score below 32/100. The path to 60+ GEO score is clear: fix the broken schema, restore the missing pages, claim directory listings, and add an owner story. The infrastructure – static HTML on GitHub Pages, permissive robots.txt, bilingual capability, and a comprehensive lms.txt – is already strong. The composite GEO Score is 40/100 (Needs Attention).

GEO Score Breakdown

Component	Score	Weight	Weighted
AI Citability & Visibility	57/100	25%	14.2
Brand Authority Signals	28/100	20%	5.6
Content Quality & E-E-A-T	35/100	20%	7.0
Technical Foundations	49/100	15%	7.3
Structured Data	28/100	10%	2.8
Platform Optimization	27/100	10%	2.7
OVERALL	40/100	100%	40

AI Platform Readiness

These scores reflect how likely your content is to be cited by each AI search platform. A score below 50 indicates significant barriers to citation on that platform.

AI Platform	Score	Status
Google AI Overviews	28/100	Needs Attention
ChatGPT Web Search	22/100	Needs Attention
Perplexity AI	24/100	Needs Attention
Google Gemini	30/100	Needs Attention
Bing Copilot	31/100	Needs Attention

AI Crawler Access Status

Blocking AI crawlers prevents AI platforms from citing your content. The table below shows which AI crawlers can currently access your site.

Crawler	Platform	Status	Recommendation
GPTBot	ChatGPT	Allowed	Keep allowed. Consider adding explicit named directive.
OAI-SearchBot	ChatGPT	Allowed	Keep allowed.
ClaudeBot	Claude / Anthropic	Allowed	Keep allowed.
PerplexityBot	Perplexity AI	Allowed	Keep allowed. Add explicit named directive for clarity.
Google-Extended	Google Gemini / SGE	Allowed	Keep allowed.
Amazonbot	Amazon Alexa	Allowed	Keep allowed.
Bytespider	TikTok / ByteDance	Allowed	Consider blocking if no TikTok presence.
CCBot	Common Crawl	Allowed	Keep allowed – feeds many LLM training datasets.
Applebot-Extended	Apple Intelligence	Allowed	Keep allowed.
FacebookBot	Meta AI	Allowed	Keep allowed.
Cohere-ai	Cohere	Allowed	Keep allowed.

Key Findings

[CRITICAL] Fabricated Aggregate Rating in Schema

The Florist schema block asserts aggregateRating: 4.9 with 347 reviews â€” no review source is cited. Google's rich result policies require ratings to be verifiable. This is a policy violation risk that could trigger a manual action. Remove immediately.

[CRITICAL] Wrong Schema Type: Florist Instead of GardenStore

Block 1 uses @type: Florist (implies a cut-flower shop). The correct types are GardenStore and/or LandscapingBusiness. Misclassification misleads Google's Knowledge Graph entity resolution and AI model entity recognition.

[CRITICAL] Wrong Domain URL in Schema (machinfarms.com)

The Florist schema block sets url to https://machinfarms.com â€” a different domain than the actual site (machinnurseryfarms.com). This breaks entity consolidation across Google Knowledge Graph and all AI model entity graphs.

[CRITICAL] Invalid Restaurant Properties in Schema

The Florist block contains servesCuisine: 'Plants and Garden Supplies', hasMenu, and acceptsReservations â€” all FoodEstablishment-only properties. These are invalid on a plant nursery and cause parser confusion.

[CRITICAL] Six Content Pages Return 404

About, Services, Plants, Gallery, Contact, and /es all return 404. The entire site is a single 650-word page. This makes topical authority, expertise demonstration, and AI citation impossible. Restoring these pages is prerequisite to all other improvements.

[CRITICAL] www vs. Non-www Canonical Conflict

The site 301 redirects to www.machinnurseryfarms.com, but the canonical tag and og:url point to the non-www version. The redirect destination and canonical tag disagree, splitting link equity.

[HIGH] Zero Confirmed Brand Authority on Third-Party Platforms

No Wikipedia entity, no LinkedIn company page (404), no Yelp listing confirmed, no BBB listing, no Houzz profile. Brand mentions score 28/100. AI models cannot corroborate this entity across independent sources.

[HIGH] Bilingual Toggle Non-Functional for Crawlers

The /es route returns 404. Spanish content appears only as misplaced alt text on the English page. No hreflang tags. The EN/ES toggle is JavaScript-only and invisible to all search engine and AI crawlers.

[HIGH] All Eight H2 Headings Are Near-Duplicate Keyword Phrases

Six of eight H2s are semantic duplicates of 'best nursery in Homestead FL.' No heading communicates unique section content. Users scanning headings receive zero new information. AI models parsing heading structure see shallow, undifferentiated content.

[HIGH] No Privacy Policy Page

No privacy policy is linked in the footer. Google Quality Rater Guidelines treat this as a baseline trust requirement. Also required for Florida/CCPA compliance given the contact form and analytics.

[HIGH] Gmail Contact Addresses for 20-Year-Old Business

machindavid2@gmail.com and Machinfarms@gmail.com are the primary contact emails. Domain email (info@machinnurseryfarms.com) is the industry baseline and a visible credibility gap in both schema and directory listings.

[HIGH] Missing Security Headers

No HSTS, Content-Security-Policy, X-Frame-Options, X-Content-Type-Options, Referrer-Policy, or Permissions-Policy headers. Site is hosted on GitHub Pages which requires migrating to Cloudflare or Netlify/Vercel to add custom headers.

[MEDIUM] Third-Party Visitor Counter Loaded Twice

counter1.optistats.ovh is injected in the footer and again dynamically via document.createElement "a" a redundant and security-unclear pattern. Replace with Google Analytics 4 or a privacy-friendly alternative.

[MEDIUM] Tailwind CSS CDN Used in Production

The CDN version of Tailwind scans the DOM and generates CSS in the browser at runtime "a" Tailwind's own documentation states this is not for production. Use a compiled and purged build to reduce page weight significantly.

[MEDIUM] Title Tag Uses Wrong Business Name

The title tag ends with 'Machin Farms' instead of 'Machin Nursery Farms.' This entity name inconsistency blocks Google Knowledge Graph consolidation and reduces trust for AI model entity recognition.

[MEDIUM] Copyright Year Stuck at 2024

The footer shows copyright 2024 while the sitemap lastmod is 2026-04-16. AI systems use date metadata to assess content freshness. An outdated copyright year signals potential staleness.

[LOW] Sitemap Lists Only 3 URLs Including Non-HTML Files

The sitemap includes / (correct), /llms.txt, and /llms-full.txt. The text files should not be submitted as indexable URLs in the sitemap. When real content pages are restored, they must be added here.

[LOW] No Image srcset for Responsive Delivery

No srcset or sizes attributes found on images. All images serve at a single resolution regardless of device screen or pixel density. On high-DPI mobile screens images may appear at inappropriate resolutions.

Prioritized Action Plan

Quick Wins (This Week)

High impact, low effort — can be implemented immediately.

1. Remove fabricated aggregateRating (4.9/347 reviews) from schema — Google policy violation risk
2. Replace @type: Florist with GardenStore + LandscapingBusiness in schema Block 1
3. Fix all schema block URLs from machinfarms.com to machinnurseryfarms.com
4. Remove invalid restaurant properties: servesCuisine, hasMenu, acceptsReservations
5. Fix canonical tag to match www redirect destination (www.machinnurseryfarms.com)
6. Claim and complete Google Business Profile for both locations as 'Machin Nursery Farms'
7. Fix title tag: 'Plant Nursery Homestead FL | Machin Nursery Farms' (49 chars)
8. Update copyright year to 2026 (use new Date().getFullYear())
9. Create LinkedIn Company Page for Machin Nursery Farms
10. Register in Bing Webmaster Tools — add msvalidate.01 tag and submit sitemap

Medium-Term Improvements (This Month)

Significant impact, moderate effort — requires content or technical changes.

1. Restore 6 broken pages: About, Services, Plants, Gallery, Contact, /es
2. Add Organization schema with sameAs linking to GBP, Yelp, LinkedIn, Instagram, BBB, Houzz
3. Add second LocalBusiness schema block for SW 162nd Ave location with branchOf link
4. Rewrite 6 H2 headings as question-format with 40-60 word direct-answer paragraphs
5. Implement genuine FAQPage schema with customer informational queries (not self-promotional)
6. Add owner/family story to About page: named owner, photo, founding narrative, one real project
7. Fix bilingual implementation: /es server-rendered HTML, hreflang tags, correct lang attribute
8. Add privacy policy page linked from footer
9. Replace Gmail with domain email (info@machinnurseryfarms.com, wholesale@machinnurseryfarms.com)
10. Launch review-generation campaign: target 25+ Google reviews within 60 days
11. Claim Yelp listing, BBB registration, Houzz profile, Nextdoor business page
12. Remove/replace counter1.optistats.ovh with Google Analytics 4
13. Route DNS through Cloudflare (free) to add missing security headers
14. Add hreflang alternate tags for EN and ES

Strategic Initiatives (This Quarter)

Long-term competitive advantage — requires ongoing investment.

1. Migrate from single-page to multi-page architecture: /tropical-plants, /wholesale, /landscape-services, /plant-delivery, /about
2. Publish 3 plant care guides: Clusia hedges in Miami, privacy plants for South Florida, tropical palms for Zone 10b

3. Create YouTube channel with 4-6 plant showcase videos (60-90 seconds each)
4. Replace Tailwind CSS CDN with compiled and purged production build
5. Pursue local press coverage (Miami Herald, UF IFAS Extension) to build Wikipedia eligibility
6. Develop Wikidata entry with verifiable properties and sameAs links
7. Add Content-Signal directive to robots.txt per IETF draft specification
8. Build wholesale/contractor landing page with specific ordering details for Bing Copilot B2B queries
9. Add srcset and sizes attributes to all images for responsive delivery
10. Embed Google Reviews widget or testimonials section with specific named customer quotes

Appendix: Methodology

This GEO audit was conducted on 2026-05-04 analyzing <https://machinnurseryfarms.com>. The analysis evaluated the website across six dimensions: AI Citability & Visibility (25%), Brand Authority Signals (20%), Content Quality & E-E-A-T (20%), Technical Foundations (15%), Structured Data (10%), and Platform Optimization (10%).

Platforms assessed: Google AI Overviews, ChatGPT Web Search, Perplexity AI, Google Gemini, Bing Copilot
Standards referenced: Google Search Quality Rater Guidelines (Dec 2025), Schema.org specification, Core Web Vitals (2026 thresholds), llms.txt emerging standard, RSL 1.0 licensing framework

Glossary

Term	Definition
GEO	Generative Engine Optimization — optimizing content for AI search citation
AIO	AI Overviews — Google's AI-generated answer boxes in search results
E-E-A-T	Experience, Expertise, Authoritativeness, Trustworthiness
SSR	Server-Side Rendering — generating HTML on the server for crawler access
CWV	Core Web Vitals — Google's page experience metrics (LCP, INP, CLS)
INP	Interaction to Next Paint — responsiveness metric (replaced FID March 2024)
JSON-LD	JavaScript Object Notation for Linked Data — preferred structured data format
sameAs	Schema.org property linking an entity to its profiles on other platforms
llms.txt	Proposed standard file for guiding AI systems about site content
IndexNow	Protocol for instantly notifying search engines of content changes
